

ANEES AHMAD

SENIOR SOFTWARE ENGINEER

Qaid Town, Street 2c, G-15, Islamabad, Pakistan | Aneesahmad17786@gmail.com | +92 303 5619057 | linkedin.com/in/anees-ahmad-dev

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 7+ years of professional experience in mobile and front-end development, specializing in **Ionic, Angular, React, and React Native** for building high-performance cross-platform iOS and Android applications. Deep expertise in **TypeScript, JavaScript, HTML5, CSS3**, and modern front-end architecture. Proven track record delivering enterprise-level solutions including HRMS platforms, workforce management systems, e-commerce apps, and real-time communication tools. Skilled in **Firebase (FCM, Firestore, Realtime Database)**, **REST API** integration, **WebSocket** real-time communication, **Capacitor and Cordova** native plugin development, and multi-environment CI/CD pipelines. Successfully published 15+ applications on both the App Store and Google Play. Passionate about clean architecture, performance optimization, and delivering seamless user experiences.

TECHNICAL SKILLS

Frameworks: Ionic Framework, Angular, React, React Native, Capacitor, Cordova

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Swift, Kotlin, Java

Firebase Services: Firebase Cloud Messaging (FCM), Firestore, Realtime Database, Firebase Authentication, Remote Config

Real-Time & Communication: Agora SDK (Audio/Video Calling), WebSocket, Socket.IO, Screen Sharing, Push Notifications, Call Detection

State Management: NgRx, Redux, Vuex, RxJS, Observables

APIs & Backend: RESTful APIs, GraphQL, JWT Authentication, OAuth 2.0, HTTP Interceptors

Database & Storage: SQLite, IndexedDB, Firestore, Async Storage, Offline-First Architecture

DevOps & Tools: Git, GitLab CI/CD, GitHub, Azure DevOps, Jira, Agile / Scrum, Xcode, Android Studio

Platform & Publishing: iOS App Store, Google Play Store, App Signing, Build Flavors, Schemes, Multi-Environment Config

PROFESSIONAL EXPERIENCE

Technical Team Lead

December 2024 - Present

Ideal Innovative Solutions (IIS) - Islamabad, Pakistan

- Lead a team of engineers in developing scalable, high-performance cross-platform mobile applications using Ionic, Angular, TypeScript, Swift, and Android (Kotlin/Java).
- Architected and implemented Firebase Cloud Messaging (FCM) push notification and call detection system handling foreground, background, and killed-state scenarios on both iOS and Android.
- Built custom Capacitor native plugins including Agora SDK audio/video calling, real-time chat via WebSocket, screen sharing, and multi-image camera capture with annotation.
- Designed and managed multi-environment Firebase configurations (Dev/Prod build flavors and schemes), maintaining separate google-services.json and GoogleService-Info.plist per environment.
- Contributed to cross-platform architecture design ensuring clean separation between native and hybrid layers for optimal performance and maintainability.
- Mentored junior and mid-level engineers, conducted code reviews, enforced coding standards and best practices across the team.
- Managed end-to-end app publishing on both App Store and Google Play, covering signing, versioning, and release cycle management.

Senior Software Engineer

January 2022 - January 2025

Saufik - Islamabad, Pakistan

- Developed and maintained cross-platform mobile applications using Ionic, Angular, TypeScript, Capacitor, and React, delivering consistent performance across iOS and Android.

- Led integration of third-party services including Firebase push notifications, real-time messaging via WebSocket, GPS location tracking, and analytics dashboards.
- Introduced and maintained GitLab CI/CD pipelines to automate build, test, and deployment workflows, reducing release cycle time significantly.
- Collaborated with UI/UX design teams to implement responsive, accessible, and performance-optimized interfaces using HTML5, CSS3, and SCSS.
- Delivered multiple production-ready applications serving thousands of end users across iOS and Android platforms.

Ionic and Angular Developer

June 2019 - December 2022

Ewarenet - Pakistan

- Developed enterprise Angular and Ionic applications with advanced features including CDK Virtual Scroll, custom pipes and directives, NgRx state management, and dynamic component rendering.
- Implemented secure offline data storage and synchronization using IndexedDB and SQLite for mission-critical enterprise applications.
- Optimized application performance through efficient change detection strategies, lazy loading modules, and reusable component architecture, improving load times and reducing bundle size.
- Integrated RESTful APIs with JWT authentication and HTTP interceptors to manage secure data flow between client and server.

KEY PROJECTS

Mobile Sentrix - Workforce and Communication Platform (HRMS)

January 2025 - Present

- Enhanced a full-featured HRMS mobile application built with Ionic and Angular enabling employee clock in/out with real-time GPS location tracking active throughout the shift.
- Implemented Firebase Cloud Messaging (FCM) for push notifications and incoming VoIP call detection supporting all app lifecycle states: foreground, background, and killed.
- Integrated Agora SDK for high-quality real-time audio/video calling and screen sharing, enabling instant team communication and remote collaboration.
- Built a secure TOTP-based authenticator module for enhanced two-factor user verification and account protection.
- Configured separate Dev and Production Firebase environments for Android (build flavors) and iOS (schemes), with independent google-services.json and GoogleService-Info.plist files per environment.
- Unified schedule, timesheet, and task management modules under a single cohesive UX to streamline daily workforce operations.
- Technologies: Ionic, Angular, TypeScript, Firebase FCM, Agora SDK, Capacitor, WebSocket, REST API, iOS, Android.

Projul - Construction Management Software (USA)

January 2022 - December 2024

- Contributed to a leading U.S. construction management platform used by contractors and field teams for project scheduling, estimating, invoicing, and time tracking.
- Developed and improved a custom Capacitor native camera plugin supporting multi-image capture and on-device annotation for project documentation.
- Implemented offline-first architecture using SQLite ensuring full app functionality in low or no network field conditions.
- Built background and killed-state GPS geolocation tracking for real-time crew location updates using Capacitor geolocation APIs.
- Technologies: Ionic, Angular, TypeScript, Capacitor, SQLite, Push Notifications, REST API, iOS, Android.

Soolah - On-Demand Cleaning Services Platform (Canada)

March 2023 - October 2024

- Built a cross-platform mobile application for booking and managing on-demand cleaning services across Canada using Ionic and Angular.
- Integrated secure online payment gateway with real-time service scheduling, booking management, and live status tracking.
- Implemented customer and service provider profile management with ratings, reviews, and service history.
- Technologies: Ionic, Angular, TypeScript, REST API, Payment Gateway, Push Notifications, Firebase, iOS, Android.

PingHub - E-commerce and Logistics Application

February 2022 - December 2022

- Developed a cross-platform e-commerce and logistics application using Ionic and Angular for both mobile and web platforms.
- Integrated QR code scanning for order processing, real-time order tracking, and live delivery status updates across multiple transport types.
- Technologies: Ionic, Angular, TypeScript, QR Code, REST API, WebSocket, Real-Time Tracking, iOS, Android.

ADDITIONAL PROJECTS

Care Courier - Medicine Delivery System

An on-demand medicine delivery application connecting patients with pharmacies and delivery partners across the city. Enabled users to search, order, and track prescription and over-the-counter medicine deliveries in real time.

Happilac - Paints E-commerce Application

A feature-rich e-commerce mobile and web application for browsing, selecting, and purchasing paint products and home decor items. Included product catalogues, colour visualization tools, order management, and a secure multi-step checkout flow.

CPR Enroll - Enrollment Management Solution

A digital enrollment platform for CPR and first-aid training courses with real-time seat availability and live schedule updates. Enabled users to register for sessions, manage certifications, and receive automated email and push notification reminders.

Kuicksave - E-commerce and Deals Application

A deals and discount discovery application with integrated barcode scanning for in-store product price comparison and savings tracking. Provided personalised offers, wishlist management, order tracking, and a seamless checkout experience across multiple vendors.

Calimatic LMS - Learning Management Platform

A comprehensive learning management system supporting course creation, student enrollment, progress tracking, and assignment submission. Delivered interactive video content, quizzes, and digital certification management for educational institutions and corporate training.

Iwish Life - Lifestyle and Goal Management App

A personal lifestyle application enabling users to create, organise, and share wish lists, life goals, and bucket list experiences. Featured social sharing, collaborative goal tracking, milestone notifications, and personalised recommendations based on user interests.

Starda - Service Management and Scheduling Platform

A service management platform for scheduling appointments, assigning field teams, and tracking job progress and completion status in real time. Streamlined daily operations for service businesses through automated task coordination, team communication, and performance reporting.

Baby Medics - Pediatric Healthcare Support App

A pediatric healthcare application providing parents with tools to track baby health milestones, vaccination records, and doctor appointments. Included growth charts, a symptom checker, feeding and sleep logs, and pediatrician consultation scheduling features.

Vaccine.pk - Vaccination Schedule and Records App (Pakistan)

A public health mobile application for managing vaccine schedules, immunisation records, and timely reminders for families across Pakistan. Helped users maintain a complete vaccination history for all family members and receive alerts for upcoming and overdue doses.

Unity Wireless - Connectivity and Communication Platform

A wireless services management platform enabling customers to manage plans, monitor data usage, view billing history, and access support. Supported service providers with customer management tools, plan configuration, and real-time usage analytics dashboards.

EDUCATION

PMAS Arid Agriculture University, Rawalpindi, Pakistan

July 2016 - July 2020

Bachelor of Science in Computer Science (BSCS) | CGPA: 3.45 / 4.0
